REPORT ON WORKSHOP ATTENDED

AAttended By: Rida, Vinitha, Nethra HB, Zuha Fathima, Zaiba, Neelufer Jeelani, Sarah Chetri, Kasis Nepal, Swarna Gowri P
Organised By: The department of psychology post graduate studies.
Name of the Event: Literature Review Methods and Tools.
Venue: PG Library of Bishop Cotton Women's Christian College.
Resource Person: Dr Sindhuja CV, senior associate professor, centre for education and social studies, Bengaluru

---

Workshop Objectives:

The workshop aimed to provide
Critical review of theory,
Identify research gaps,
Illustrate various review structures,
Identify criteria for developing research questions that can be answered.

Workshop Outline: The psychology research proposal workshop, led by Dr Sindhuja CV, covered important aspects of research proposal development in psychology. During the workshop, we were required to bring our laptops. The workshop focused on the significance of literature review, choosing the right statistical and data analysis methods for psychological research, using specialized, various AI tools for conducting literature and identifying gaps, such as Elicit and SciSpace. Understanding different types of research designs applicable to psychological studies. Overall, the workshop, held at the library, provided participants with essential knowledge and skills to improve their ability to write research proposals in psychology. We also downloaded the SPSS file and discussed specific research study topics

Conclusion

In conclusion, the research provided participants with valuable insights into key components of research proposal development. The comprehensive coverage of review of literature, statistical analysis, data analysis, tools for literature review, and types of research design equipped participants with essential knowledge and skills to do their research study.
